## **simple food for the pdf**

Staple food are food items that can be stored easily and eaten throughout the year. Different kinds of staple foods are used in different parts of the world.. The term means the common basis of the everyday diet in a place. Potatoes and rice are the most usual examples, but bread is not a staple food because it is a manufactured food which cannot be stored. Of course, it can always be made ...

Food poisoning is when someone gets sick from eating food or drink that has gone bad or is contaminated. There are two kinds of food poisoning: poisoning by toxic agent or by infectious agent. Food infection is when the food contains bacteria or other microbes which infect the body after it is eaten. Food intoxication is when the food contains toxins, including bacterially produced exotoxins ...
